FULL STACK SOFTWARE ENGINEER — REACT / TYPESCRIPT / CSS / NODE.JS

Full stack engineer with 5 years of professional experience in React, TypeScript, and CSS, building systems that connect customers and internal operators: customer apps used by 1M+ monthly users and an ERP for 130+ users across 3 offshore teams. Designs scalable REST APIs, data flows, and system integrations on Node.js and AWS, with deep expertise in front-end performance and UI/UX. Based in Anaheim, CA and available remote or at the Los Angeles office.

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer, R&D | Focus 360 | Aliso Viejo, CA | Sep 2026–Present

- Built systems that bring together customers, sales teams, and internal operators: customer-facing kiosk apps plus an ERP and Scheduling platform used by PMs, PCs, production, and offshore teams.
- Own product development and workflow improvements across ERP, Scheduling, and DAM systems used by PMs, PCs, production, and offshore teams, driving full-stack initiatives end to end from requirements and technical planning through testing and production deployment.
- Serve as Scrum Master, managing Agile sprints, JIRA epics, and team deliverables, and lead weekly product meetings that drive technical discussions and align development priorities with business needs.

Full Stack Developer, R&D | Focus 360 | Aliso Viejo, CA | Sep 2022–Sep 2026

- Built responsive, polished React and TypeScript interfaces from reusable components, reducing duplicated frontend code by 40%.
- Designed and optimized MySQL databases and REST APIs for high-volume data retrieval and complex internal workflows, cutting key load times from 6–7s to as little as 0.5–2s.
- Built scalable serverless backend services with Node.js and AWS (Lambda, API Gateway, S3, CloudFront, CloudWatch), using SQS queues and EventBridge for scheduled CRON jobs.
- Improved reliability with Cypress end-to-end and Postman API tests that increased automated coverage and reduced regressions, and mentored interns through onboarding and code reviews.
- Integrated AI-assisted development workflows using Cursor, Claude, and Codex to accelerate development, debugging, and code iteration while holding code reviews to team standards.

SELECTED PROJECTS & IMPACT

NEXT™ Client-Facing Application Suite | Focus 360

- Built interactive customer-facing web applications used by 1M+ monthly users, delivered as installable PWAs on touch-based kiosks across thousands of sales centers nationwide.
- Integrated live housing data through AWS Lambda, SQL queries, and secure REST APIs to power real-time floor plans, pricing, and other customer-facing content.
- Improved offline support and performance with Workbox service workers, reducing repeat-load times and AWS CloudFront egress costs by 80%.

ERP Workflow Automation System | Focus 360

- Architected and developed an ERP platform in React and TypeScript for 130+ users across 3 offshore teams, reducing project delivery times by 30% and improving operational productivity by 70%.
- Integrated the in-house Digital Asset Management (DAM) platform with the ERP for asset creation, updates, and retrieval, streamlining work order workflows.

CORE TECHNOLOGIES

Frontend: React, Next.js, TypeScript, JavaScript, Redux, Zustand, TanStack, HTML5, CSS3, Tailwind CSS, Styled Components, Shadcn UI, Material UI, Accessibility, SEO, Responsive Design

Mobile & Platforms: React Native, Progressive Web Apps (PWA), iOS & Android concepts, Cross-Platform Development, Workbox Service Workers

Backend & Integrations: Node.js, Express.js, REST APIs, AWS Lambda, API Gateway, SQS, EventBridge, Serverless Architecture, Socket.IO

Data & Cloud: MySQL, PostgreSQL, SQL Query Development, AWS, S3, CloudFront, CloudWatch, Docker, Heroku

Quality & Delivery: Cypress, Postman, CI/CD, Git, npm, Vite, Webpack, Babel, Scrum/Agile, JIRA, Code Reviews, Google Analytics

AI-Assisted Development: Cursor, Claude, Codex, Agentic Workflows

EDUCATION

Accelerated Web Development Program — LearningFuze, Irvine, CA

800+ hours of intensive full-stack development training in a real-world, mentor-led engineering environment.
